

Open Awareness and Information Hub

Awareness raising and training, as well as the implementation of stronger cybersecurity strategies, tools and protection mechanisms, are vital steps for changing organisational cultures and attitudes towards cybersecurity, and minimising cybersecurity incidents.

The SecureHospitals.eu Open Awareness and Information Hub seeks to provide a one-stop-shop for healthcare organisations and their personnel to find information, awareness raising materials, training courses, as well as technical solutions and consultancy services dedicated to cybersecurity in healthcare settings.

Training Offers

Technical & Consultancy
Solutions

You are a Cybersecurity Solution Provider?

The SecureHospitals.eu online hub provides you the opportunity to showcase different types of solutions and bring them closer to your clients. Do you provide training, technical solutions, legal expertise, or management consulting services for tailoring organisations' cybersecurity strategies? The registration process is now open for organisations as well as for individual cybersecurity trainers providing on demand training and consulting.

You are an Individual Cybersecurity Trainer?

SecureHospitals.eu offers you the opportunity to present yourself to a fast-growing network of training organisations and training seekers, connect yourself with influential training providers, and get more visibility by connecting your profile with upcoming courses.

Community of Practice

Are you a healthcare professional, cybersecurity expert, or in any way related to the community?

The CoP seeks to provide a virtual meeting space for all stakeholders on cybersecurity in the healthcare sector to connect with peers, exchange experiences, best practices, and developments in the field.

The CoP functionalities allow you to connect in public and private groups, run forum conversations, share documents, contact members directly, and link groups to existing courses listed on the platform.

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 826497.
